

# Wireless Restaurant Ordering Solution

[www.captainpad.com](http://www.captainpad.com)

# // POS Software ( Point of Sale )

CaptainPad is the technological wireless ordering software solution (POS) for restaurants. It is made of wireless Order entry device (CaptainPad / Android mobiles) and POS server software.

Captain / Waiter can now enter customer order on wireless order entry device and then sends order wirelessly to kitchen.

Speedy wireless ordering operation helps to increase the table turnover and sales. Optimum staff utilization reduces the labor cost and it also helps you to improve the customer service.

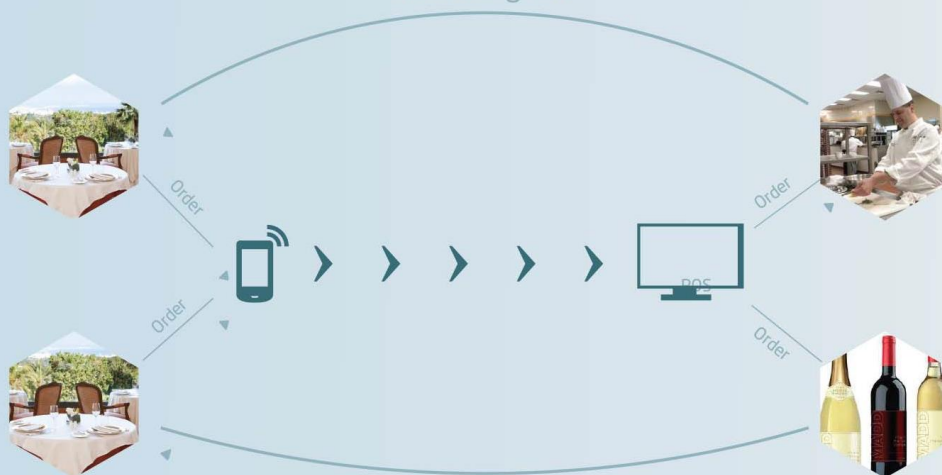

## Features

- Fast wireless ordering operations with improved customer service.
- Increases table turnover and sales and profitability.
- Optimum staff utilization reduces the labor cost.
- Remote printing for kitchen / bar order tickets at different locations.
- No billing errors & no billing manipulations.
- Secured wireless transactions.
- Remote access from anywhere from PC and mobile.
- Wireless ordering support on android mobiles and tabs.
- Quick installation and after sales service.
- Installed at more than 500 restaurants across country.

## How It Works

1. Captain / Waiter enters customer order on order entry device (Android mobile).
2. Clicks on order button to send order wirelessly to kitchen.
3. CaptainPad server receives the order and then further prints it to Kitchen printer or Bar printer.
4. Waiter can view/print order copy at waiter screen device.
5. Cashier can print bill immediately when required.

# // Material Management Software

MMS is the material management system (Purchase/ Stock management). This solution is for handling material operations (Purchase) in the restaurant. It helps you to optimize this purchase operation and increases the profitability.

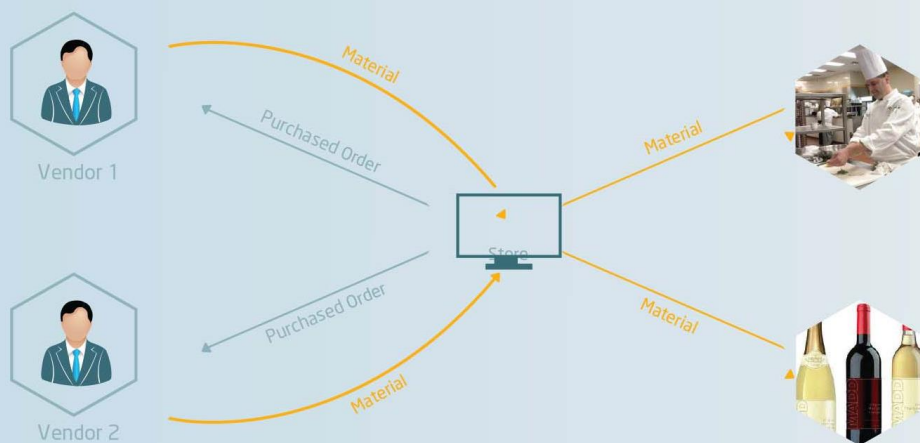

## Features

- Fast wireless ordering operations with improved customer service.
- Inward/Outward (Issue) operation with detail reports.
- Stock level with color indication.
- Integration with POS to see actual item consumption.
- Indent and purchase order generation.
- Track and optimize purchase and increase the profitability.
- Remote access from anywhere using PC or Mobile.
- Reports in CSV and PDF format.
- Role based access control.

## How It Works

1. Store operator enters vender wise purchase bills to MMS.
- 2 This results in addition of stock to the main store.
3. He then issues material from main store to different departments like Indian, Chinese, Bar.
4. He can also generate PO based on the material requests.
5. He can track all issued material by quantity and value.
